 github.com/lalitkaushal007

.NET Software Developer with experience building **scalable telecom and SIM / device management platforms** using **ASP.NET, C#, and SQL Server**. Skilled in **RESTful API development, system integration, and database performance optimization**. Experienced in **developing and maintaining production-grade backend systems and automating operational workflows**.

EDUCATION

Bachelor of Technology (Electrical and Electronics Engineering)

Jun 2019 - Jul 2023

Noida Institute of Engineering and Technology (AKTU), Greater Noida, Uttar Pradesh

SKILLS

Programming Languages and Web Technologies: - C#, HTML, CSS, Bootstrap, JavaScript, jQuery

Backend and Frameworks: - .NET Core, ASP.NET, ADO.NET, Entity Framework, Webforms, MVC

Database Technologies: - MS SQL / SQL Server, MySQL, PostgreSQL, Database / DBMS, RDBMS

Concepts & Constructs: - Web API / RESTful API, Object-Oriented Programming (OOP), Data Structures, Jira, SDLC, Agile, Scrum

Developer Tools: - Visual Studio, VS Code, Git, GitHub, Postman, Swagger, ChatGPT, GitHub Copilot

Additional or Soft Skills: - Analytical Thinking, Computer Security Systems, Problem Solving, Teamwork, Effective Communication

EXPERIENCE

Software Developer (.NET) – Inventia Technology Consultants [Noida Sector - 68, U.P.] [July 2026 – Present]

- Developed an SLA Management & Reporting System using ASP.NET Core, C#, PostgreSQL, and RESTful APIs for monthly SLA data processing and reporting.
- Implemented Excel upload/download, validation, staging, preview, confirmation, and automated SLA status calculation using PostgreSQL stored procedures.
- Developed SLA dashboards and reports with State, DISCOM, SLA Type, Month, Year, and Status-based filters for monitoring SLA performance.

Associate Software Developer (.NET) – ENK Technologies, [Noida Sector - 73, U.P.] [Oct 2025 – July 2026]

- Designed and developed the **USA-based telecom portal UTel** using ASP.NET and C#, enabling features such as SIM activation, recharge processing, reporting, invoice generation, and bulk operations for SIM activations and recharges.
- Implemented **API-based integration between the ENK platform and the UTel portal**, allowing both applications (hosted on separate production servers) to operate seamlessly through **centralized ENK authentication and unified user access**.
- Developed and integrated **RESTful APIs** to enable secure cross-platform communication and data exchange between telecom services and internal systems.
- Automated backend operational workflows using scheduled scripts and background services, significantly reducing manual operational tasks.
- Maintained and monitored production deployments** across multiple IIS servers, ensuring system **stability and uptime**.

Associate Software Developer (.NET) - Virtuzo Infosystems Pvt Ltd, [Noida Sector - 62, U.P.] [Aug 2024 – Sep 2025]

- Designed and developed a comprehensive **WIFLY Device Management Portal** using **ASP.NET** and **C#**, enabling functionalities like **Device activation, Recharge, Reporting, Plan verification, invoice generation & more**.
- Built optimized **SQL Server DB** with efficient **tables, stored procedures, and functions** for robust data handling. Integrated **REST APIs** for seamless third-party and inter-module communication. Successfully deployed and maintained solution in the **production**.
- Designed and developed **RESTful APIs**, performed seamless **API integrations**, and **managed configurations for API holders** to support both **internal teams and external clients**.
- Partnered with cross-functional teams to **enhance database security** by implementing **role-based access controls**, enforcing strict **password policies**, and ensuring compliance with **data privacy regulations**.

.NET Developer Intern - Virtuzo Infosystems Pvt Ltd, [Noida Sector - 62, U.P.] [Feb 2024 – July-2024]

- Developed and maintained **real-time applications** including the **USA Telecoms Network Boom Commission Portal**, implementing CRUD APIs and Data Import/Export modules, reduced API response time, significantly enhancing user experience.
- Designed **RESTful Web APIs**, documented **endpoints using Swagger**, and performed **API testing via Postman** to ensure reliability.
- Implemented **database operations** using **ADO.NET** with **MS SQL/SQL Server** for seamless data access and manipulation.
- Provided night **technical support** across all production portals, ensuring zero downtime during releases and critical operations. **Led deployment issue resolutions** and extended post-shift support for urgent production fixes.

PROJECTS

E-LIBRARY MANAGEMENT SYSTEM | Personal Project | Full-Stack Web Application Development

Technologies: - **Frontend:** (HTML5, CSS3, Bootstrap, jQuery, JavaScript), **Backend:** (ASP.NET Framework (C#), SQL Server).

- Built a full-stack library management system supporting user authentication and resource management.
- Implemented dynamic search functionality and responsive UI using JavaScript and Bootstrap.
- Optimized SQL queries for faster resource retrieval and efficient database performance.

COURSES & CERTIFICATIONS

.NET Fundamentals – **Great Learning**: Learned the basics and Advanced of C#, ASP.NET, and full-stack .NET development.

Data, Data Everywhere – **Google (Coursera)**: Covered data analytics fundamentals and data-driven decision-making.

Python for Data Science – **IBM (Cognitive Class)**: Learned Python for data analysis using libraries, and visualization tools.

ACHIEVEMENTS

Solved 300+ algorithmic coding problems across **LeetCode**, **HackerRank**, and **CodeChef**, sharpening DSA expertise.

Earned 5-star ratings on Hackerrank in **C#** , **.Net** and **Problem Solving** recognized for consistent top-tier performance.

Achieved 100% completion in the MountBlue Coding Challenge, showcasing problem solving skills under time constraints.
